

**Global Greentag
certifies Enzyme Wizard**

Overview of Certification

LCARate. The toughest scientific scorecard in the world.

The most comprehensive certification on the planet.

Global GreenTag's LCARate scores products against six main Sustainability Assessment Criteria and a further twenty plus Life cycle and Social criteria.

Greentag's Cleaning Products

What is it?

The market for ethically produced and sustainable products is growing at a record pace. That's good news. But with big budget brands desperately trying to capture the "green market" it is hard for the buyers to see through their big budget advertising and make wise buying choices.

Greentag's cleaning products certification cuts greenwash right to the squeak

Enzyme Wizard makes those choices easier

You don't have to spend precious time poring over lists of ingredients, looking for the lurking time bomb in that supposedly "green" product, it can start to feel like you need a science degree just to stay safe and ethical in your choices.

Enzyme Wizard together with Global Greentag has made it easier for you the consumer and professional to identify products that are safe and sustainable at a glance

- Enzyme Wizard No Rinse Floor Cleaner
- Enzyme Wizard Multi-Purpose Bathroom Kitchen Spray and Wipe
- Enzyme Wizard Bathroom / Toilet.

Enzyme Wizard achieved Platinum Status

We are the best of the best, no health impacts or substances of concern at any stage of the life cycle.

Platinum products are GMO free, use only RSPO Certified Sustainable Palm Oil with full disclosure of potential sources, use only legally sourced, sustainably sourced wood and ethical, child and slavery free employment practices. They protect and restore the planet's biodiversity, are typically 'climate neutral' and often 'climate positive'.

Enzyme Wizard, we have become part of the world leaders in offering ethical and sustainable products.

Our Mission Statement

Enzyme Wizard the leader in Enzyme Technology

For the past decade Enzyme Wizard has brought you state of the art cleaning technology and now when it comes to Sustainability, we want to cut out the guess work and cut to the chase.

Don't expose yourself to substandard products and unverified environmental claims.

Trust the GreenTag.

Global Greentag

Buyers want the best in healthy eco-products – Global Greentag makes it easy to recognize. We're here to build trust back into the green marketplace and save the planet in the process

Greentag is recognized by the most prominent certification schemes in the world. What's more, if the product does not pass the fit-for purpose test, they won't certify it. The good thing is that you know the product you are purchasing is safe and healthy for you and the future.

GreenTag's GreenRate program is for green design, facilities, management, procurement, and cleaning professionals.

GreenRate Program

Professionals seeking to achieve points under the Green Building Council of Australia's Green Star, 'Sustainable Products' and 'Green Cleaning' credits.

GreenRate™ is also relevant to Infrastructure professionals working with the 'IS' rating tool from the Infrastructure Sustainability Council of Australia

Credibility

GreenTag is an ISO compliant Conformance Assessing body, Type 1 Ecolabel and Environment Product Declaration Program (EPD) and as required by these standards and operates an extensive EPD program.

Our Products

No Rinse Floor Cleaner

No Rinse Floor Cleaner – the product is soap free as well as pH neutral. This ensures the flooring cleaned won't get damaged and no residual soap will be left behind leaving a static free floor and no build up in the grouting.

Multi-Purpose Bathroom/Kitchen spray

Multi-Purpose bathroom kitchen spray and wipe is also designed to be soap free and pH neutral. The unique multi enzyme formula will break all organics on the surface from fats and oils to sugars and starches. By converting the organics to water and Carbon and oxygen the surface is left super clean

Bathroom/Toilet

Bathroom/Toilet is a multi-purpose cleaner designed to be used in the toilet bowl as a ready to use product as well as a general bathroom spray and wipe to clean glass, tiles taps and sinks. The product being soap free will leave the surfaces streak free and clean.

About Sustainable Choice

Social and environmental sustainability starts with an open and honest dialogue. We want to be where the conversation happens and create a public record that makes it easy for people to compare the brands they buy from every day.

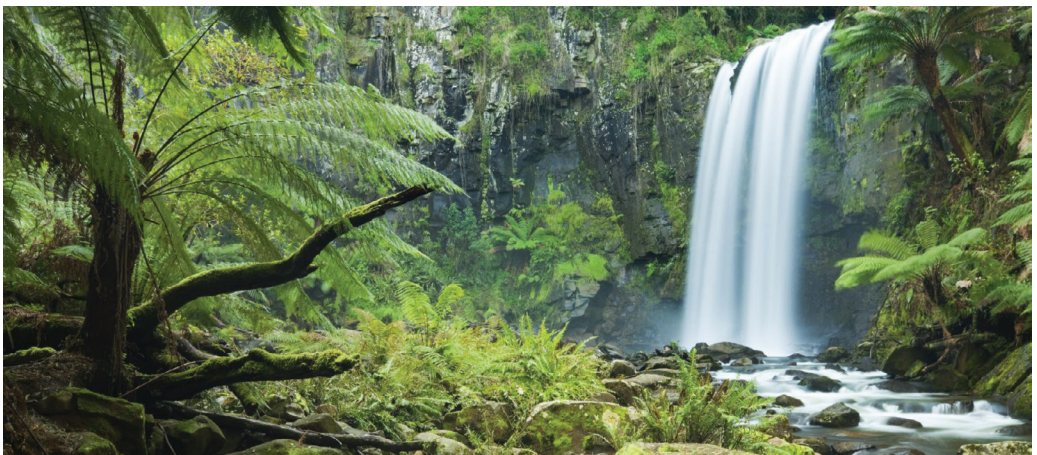

Trusted transparency

We are a 100% independent platform designed to decode sustainability messaging.

People are faced with various purchasing decisions every day and decide based on what's important to them; how much it costs, where the product comes from, what the product is made of, is it organic – and now more than ever – the impact that the product or business has on the environment.

We understand that environmental and social transformation takes time, expertise and substantial financial investment from businesses. Big change doesn't always happen overnight.

Our platform is designed to make it easy for businesses to collaborate, self-report and substantiate their actions towards a better future, and even easier for consumers to find useful, trusted information about the brands they love!

Who we are

Enzyme Wizard, the leader in Enzyme technology and Innovation now brings you the best in the next generation of Certified products.

We are here to protect the future of our children and the planet. With this in mind, we have researched and investigated the best certification that fits the innovation that we bring to market. We looked at two important factors when looking at Certification:

- Certification that looks at the effect of chemicals on you as the user.
- Certification that looks at the quality of the result in the space that is being cleaned and maintained – Air quality.
