

Drain Odour Eliminator & Maintainer Product Information

Enzyme Wizard Drain Odour Eliminator & Maintainer works naturally to help break down organic matter. This helps improve drain performance.

- Easy single dose application.
- Safely cleans clogged and problem drains, including floor drains, beverage tower drains, urinals and commodes.
- Will not generate heat or corrode plumbing.
- Naturally clears pipes and drains
- Deodorizes by attacking the organic source of odours.

What's innovative about the Drain Odour Eliminator & Maintainer?

Multi Function Enzyme:

The Benefits of Adding a Multi-Enzyme Solution:

- A more sustainable cleaner. Enzymes are readily biodegradable.
- Having the broad spectrum of enzymes, ensures the breaking down of all the organic matter in the drain
- Improved performance. The synergistic effect of combining several enzymes results in improved drain efficiency beyond what single enzymes and traditional surfactants can achieve.
- Energy-efficient product, ensuring the elimination of odours deep into the drain pipe and opening up drain lines ensuring free flow, without the need for a expensive equipment.
- Enzyme cleaners are naturally occurring elements so they are "Planet-Safe", as well as being plant based and won't affect natural bacteria in the sewer system.
- Safely clears drains without toxic bleach or chlorine.

DRAIN ODOUR ELIMINATOR & MAINTAINER

Treats and maintains drains as well as augmenting bacterial strains in septic tanks.

kitchen drains, shower drains, beverage towers, urinals.

- The enzymes in our Drain Odour Eliminator & Maintainer break down organic matter & odours into their basic elements. Carbon, hydrogen and other elements readily integrate with the environment instead of polluting it. Plus, our enzymes completely remove odours.
- **Complete Ingredients:** Water, Enzyme Wizard enzymes blended from plants, surfactant and non-essential fragrance.
- **Material Data Sheet:** Available on web site. www.enzymewizard.com.au

Enzymes - Nature's Toughest Cleaner

Drain Odour Eliminator & Maintainer

Blocked or Stopped Drains:

Pour 120ml into drain that needs treatment.

The enzymes need time to breakdown the organic matter, so apply the product at night so that the enzymes can go to work without being diluted. Please note don't put any liquid down the drain as this will dilute the enzyme down and reduce the efficacy.

For blocked or stopped drains pour Enzyme Wizard Drain Odour Eliminator & Maintainer into the drain daily until drain is unblocked. For problem drains, dose the drain twice weekly as a maintenance dose once drain has been cleared.

If there are odours coming out of the drain, dose the drain until the odour has gone.

For Shower drains, even though there is hair that blocks the drain, the enzyme will break down the soap scum as well as the body oils that hold the hair together. Once the soap scum and body oils have been broken down, the hair will dislodge and move down the drain. In this case multiple doses will be required as one does not know the extent of the blockage.

Drain Maintenance:

In most cases the product can be used as a drain maintainer after a blocked drain has been opened by a professional plumber. The product can be applied twice weekly – this will stop the drain from blocking up again and prevent foul odours from coming up from the drain. (Old pipes narrow over time which leads to frequent blocking of drains)

Important Information:

The enzymes are a multi-function enzyme and will break down all organic matter that is in the drain. In most cases there are various types of organic matter in the drain. This is where the multi-enzyme formula works at its best.

For the best results application of the product is important – the results will be quicker and savings will be noticed. Daily applications and at night is first port of call when applying the product.

This is not a caustic product, so results will vary as well as time to fix the problem is variable as well.

Please use the maintenance program to maintain the cost effectiveness of the product.

What is the Safer Chemistry Designation?

Enzyme Wizard is committed to providing our customers with effective products that are environmentally responsible, as well as safe for use around children and pets. We are continually looking for ways to limit our environmental impact through our enzyme based cleaners.

Many formulas receive the Safer Chemistry™ designation.

Disclosure of Ingredients

Enzyme Wizard is also committed to disclosure of all ingredients under the Safer Chemistry™ program.

In the above the pipe on the left is the build-up of organic matter which occurs over time. With the correct dosing of the Drain Odour Eliminator & Maintainer the build-up of the organic matter is removed. As you can see the drain pipe then becomes free flowing. As the build-up in the pipe increases the urine and any liquid builds up behind the build-up, this then causes odours to go back up the pipe into the bathroom or building.
