

No Rinse Floor Cleaner

Product Information

Enzyme Wizard No Rinse Floor Cleaner is an Industrial strength cleaner for hard surfaces in restaurants.

- Contains a proprietary soap-free multi-enzyme formula designed to break down grease, oil, and food waste. Rather than merely pushing the soil around with soap, the multi-enzyme formula destroys the grease and grime.
- Naturally lifts grease from grout lines
- Eliminates odours by destroying the organic matter. It does not just mask odours!
- No Deck Brushing! Mop & Go!!!
- Designed to discharge down the drain where the enzyme formula will continue to attack the grease and food waste- septic safe.
- pH neutral, non-corrosive and safe for all surfaces not harmed by water.

What's innovative about the No Rinse Floor Cleaner?

Organic Multi Function Enzyme
The Benefits of Adding a Multi-Enzyme Solution:

- A more sustainable cleaner. Enzymes are readily biodegradable.
- Support for the "compaction" trend. Low volumes of enzymes are required to replace high-volume ingredients such as surfactants and builders.
- The synergistic effect of combining six active enzymes results in improved stain removal and overall floor cleaning beyond what single enzymes and traditional surfactants can achieve.
- Energy-efficient product. Enzymes work well even at low temperatures, allowing wash temperature reductions and thereby energy savings.
- Enzyme cleaners are naturally occurring elements.

NO RINSE FLOOR CLEANER

MOP and GO! floor cleaner that saves time - no rinsing required.

kitchen floors, tiles, lino, concrete, wooden floors, dining areas, patios & entry ways, bathrooms, unsealed tiles.

The enzymes in our No Rinse Floor Cleaner break down stains & odours into their basic elements. Carbon, hydrogen and other elements readily integrate with the environment instead of polluting it. Even mineral buildups simply fall apart when our enzymes break down the organic 'glue' that holds it in place.

Complete Ingredients: Water, Enzyme Wizard enzymes blended from plants, surfactant and fragrance.

Enzymes - Nature's Toughest Cleaner

No Rinse Floor Cleaner

How to Use:

1. Dilute the product at a ratio of 100:1
2. Measure out 100ml and pour into 10L bucket of water
3. If one fills 10L bucket half full, use: 50ml
4. Make sure to use new mop head to avoid streaking.
5. Wet mop head as you normally would.
6. When squeezing out mop head, leave mop head wet.
7. Mop floor as you usually would, leaving a thin layer of solution - this will allow the enzymes to work at their best.

Start mopping at farthest point from left to right door working back towards door.

A = Rinse mop in bucket and then carry on

Safer Floors

Slip Co-efficient Results

No Rinse Floor Cleaner improves surface friction for floors, creating better grip and less slip. This multi-enzymatic formulation continues to break down dirt layers long after the mopping has stopped. In fact, users are amazed at the way heavily soiled tile grout lines continue to be restored after initial treatments. Once grease-layered slippery floors suddenly have improved traction, which helps protect against falls and injuries. In some instances, a facility can qualify for reduced liability insurance premiums due to the significant reduction in falls, injuries, and workman compensation claims.

Important Information:

- Ensure that when changing over to the No Rinse floor cleaner use a new mop and bucket.
- One can use either a string mop or a flat head micro fiber mop. Better results are achieved with a flat head micro fiber mop.
- When first starting with No Rinse Floor Cleaner, one can either high pressure wash floor and then start mopping or one can just start with mopping the floor straight away. With standard mopping, results will occur after a day or two
- After mopping, rinse mop and stand mop upright in cupboard. Enzymes will carry on working and stop the mop from smelling.
- Do not mix No Rinse floor cleaner with other chemicals as this will deactivate the enzymes.

What is Global GreenTag?

Global GreenTag International is one of the world's most robust, trusted, and widely recognised eco-labels that conducts sustainable, healthy and ethical product assessments. They independently assure that every product is assessed using the world's best scientific methods.

Enzyme Wizard submitted No Rinse Floor Cleaner to be evaluated under the GreenTag Product Health Declaration (GreenTag PHD™) Program, where the product achieved a world leading PlatinumHEALTH™ HealthRATE™ certification.

Why is the Global GreenTag certification important?

Having third-party verification gives our customers added confidence in the product's health and safety credentials and its compliance with relevant environmental requirements.

In Australia, the Global GreenTag PHD and HealthRATE are recognised under the Green Building Council of Australia (GBCA) Green Star® Tools, while globally (including Australia), the PHD is formally recognised by projects in LEED® (in over 170 countries) and by the International WELL™ Building Institute – a Building Standard that is concerned with the impact of buildings on human health and well-being and therefore require products to be certified healthy in-use. WELL Projects are in 122 countries.
